## STATEMENT OF FACT

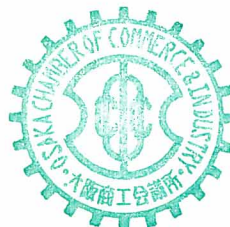

An extremely severe earthquake centered in the Tohoku district struck on Friday, March 11. The nuclear power plant in Fukushima prefecture was damaged. Ministry of Education, Culture, Sports, Science and Technology, Japan (MEXT) has been monitoring environmental radioactivity level in fallout, water, vegetables, and food by prefecture. The government has not found any radioactive falls in Hyogo and Osaka prefecture. FINE Company Head Quarters and factories located are more than 660km away from the Fukushima Nuclear Power Plant.

We have been monitoring all the resource of ingredients and final products at the Fine Bio Science Laboratory, Osaka University and at factories' QC center. FINE Co., LTD. assures the products we manufacture at our factories are under control and safe. We guarantee that FINE's health food products and cosmetics coming in form liquid, confectionary, capsules and/or tablets manufactured at the factory are safe and highly beneficial to health and beauty that used for the promotion of a person's general well-being.

Sincerely yours,

Nobutsuna Sasaki
